Powder Technology, 74 (1993) 294–295

Subject Index of Volume 74

Aerial spray cleaning
  of high voltage insulators, 13
Agglomeration
  of polyolefin particles in fluidized bed with central jet:
    experimental study, 231
    theory, 239
Autocatalytic effects
  kinetic characterization of: thermogravimetry of WO_3 reduction in hydrogen, 31

Bed height
  maximum spoutable: prediction of, in two-dimensional spouted beds, 97
Beta distributions
  test for, 89
Bubble coalescence
  gas and particle flow model in freeboard of fluidized bed based on, 121
Bulk solids
  influence of surcharge level on flowrate of, from mass flow bins, 141
Buoyancy force
  corrected; model equations of Gibilaro and Foscolo with, 287

Charged particles
  deposition of, in channel, 135
Coals
  dry ultrafine; survey of characterization techniques of, and their relationships to transport, handling and storage, 47
Coating mass distribution
  from spouted bed seed coater; experimental and modelling studies, 259
Coating rate
  maximum: effect of process variables on, and elutriation; spouted bed seed coating, 215
Compaction properties
  effect of punch velocity on, of ibuprofen, 171
Cyclone
  experimental study of, with tangential secondary air injection, 79

Dental amalgam
  trituration of, 39
Dispersion
  dilute; distribution of velocities of concentric sphere in, of spheres sedimenting in spherical container, 159

Elutriation
  effect of process variables on maximum coating rate and; spouted bed seed coating, 215

Flow and processing systems
  characterization of particle populations in, by moment distribution functions, 107
Flowrate
  influence of surcharge level on, of bulk solids from mass flow bins, 141
  particle; simplified model for predicting, from mass flow bins, 153
Fluidization
  cyclic; pressure swing granulation, novel binderless granulation by, and gas flow compaction, 1
Fluidized bed
  agglomeration of polyolefin particles in, with central jet:
    experimental study, 231
    theory, 239
  circulating, furnace; effect of some operating parameters on heat transfer to vertical fins in, 249
  gas and particle flow model in freeboard of, based on bubble coalescence, 121
  0.254 m diameter circulating, reactor; ozone decomposition in, 73
Food comminution operations
  particle size formation during, 279

Gas flow compaction
  pressure swing granulation, novel binderless granulation by cyclic fluidization and, 1
Gas flow control
  in fixed granular bed, 199
Gas and particle flow model
  in freeboard of fluidized bed based on bubble coalescence, 121
Granular bed
  fixed; gas flow in, 199
Granular materials
  heaped; idealized three-dimensional model of, 271
Granulation
  pressure swing, novel binderless granulation by cyclic fluidization and gas flow compaction, 1

Heat transfer
  effect of some operating parameters on, to vertical fins in circulating fluidized bed furnace, 249
High voltage insulators
  aerial spray cleaning of, 13
Horiba CAPA-700
  approach to improve accuracy of sub-micron particle size distribution measurement using, 67
Hydrogen
  thermogravimetry of WO_3 reduction in; kinetic characterization of autocatalytic effects, 31

Ibuprofen
  effect of punch velocity on compaction properties of, 171
Impulse discharge
  formation of monodisperse refractory metal particles by, 23
Insulators
  high voltage; aerial spray cleaning of, 13

Mass flow bins
  influence of surcharge level on flowrate of bulk solids from, 141
  simplified model for predicting particle flowrate from, 153

Model equations
of Gibilaro and Foscolo with corrected buoyancy force, 287
Moment distribution functions
characterization of particle populations in flow and processing systems by, 107
Monodisperse refractory metal particles
formation of, by impulse discharge, 23

Non-spherical particles
characterization of, from their packing behaviour, 205

Ozone decomposition
in 0.254 m diameter circulating fluidized bed reactor, 73

Packing behaviour
characterization of non-spherical particles from their, 205
Particle flowrate
simplified model for predicting, from mass flow bins, 153
Particle populations
characterization of, in flow and processing systems by moment distribution functions, 107
Particle size distribution measurement
sub-micron; approach to improve accuracy of, using Horiba CAPA-700, 67
Particle size formation
during food comminution operations, 279
Particle transport
assessment of model for, in absence of airflow through cascading rotary dryers, 61
Pneumatic conveying systems
pressure fluctuations in, 179
Polyolefin particles
agglomeration of, in fluidized bed with central jet:
experimental study, 231
theory, 239
Pressure fluctuations
in pneumatic conveying systems, 179
Pressure swing granulation
novel binderless granulation by cyclic fluidization and gas flow compaction, 1
Punch velocity
effect of, on compaction properties of ibuprofen, 171

Rotary dryers
cascading; assessment of model for particle transport in absence of airflow through, 61

Sedimentation
distribution of velocities of concentric sphere in dilute dispersion of spheres sedimenting in spherical container, 159
Seed coater
spouted bed: coating mass distribution from: experimental and modelling studies, 259
Seed coating
spouted bed: effect of process variables on maximum coating rate and elutriation, 215
Spouted bed(s)
seed coater: coating mass distribution from: experimental and modelling studies, 259
seed coating: effect of process variables on maximum coating rate and elutriation, 215
two-dimensional: prediction of maximum spoutable bed height in, 97
Surcharge level
influence of, on flowrate of bulk solids from mass flow bins, 141

Tangential secondary air injection
experimental study of cyclone with, 79
Thermogravimetry
of WO_3 reduction in hydrogen: kinetic characterization of autocatalytic effects, 31
Trituration
of dental amalgam, 39
Tungsten
thermogravimetry of WO_3 reduction in hydrogen: kinetic characterization of autocatalytic effects, 31

Ultrafine coals
dry; survey of characterization techniques of, and their relationships to transport, handling and storage, 47

Velocity distribution
of concentric sphere in dilute dispersion of spheres sedimenting in spherical container, 159

Zirconium
characterization of nano-sized ZrO_2 powder, 7
